QUIZ

From the word list, choose the correct answer to each of these questions:

1. A device for use at home which runs on electricity	
2. A device which converts mains voltage electricity to low voltage	
3. One million Watts	
4. Part of an electric circuit which protects it from an overload of current	
5. A device which will not allow an electric current to flow through it	
6. Electricity which builds up in one place is called _____ electricity	
7. A device which turns mechanical energy into electrical energy	
8. The kind of electricity that is supplied to your house	
9. A device which will allow an electric current to flow through it	
10. Electricity is a form of _____
