Quiz: From the word list, choose the correct answer to each of these questions:

1. About 80% of the air we breathe consists of this gas	
2. This gas is necessary to support burning	
3. A word that means "burning"	
4. Two or more atoms joined together	
5. The chemical process of making a metal from its ore	
6. The two elements that make up the Earth's core	
7. A chemical that is changed into other chemicals in a chemical reaction	
8. A chemical that is made as a result of a chemical reaction	
9. It requires a lot of electrical energy to produce this metal from its ore	

10. This everyday product is made in a chemical reaction from fat or oil

ANSWERS

- 1. About 80% of the air we breathe consists of this gas
- 2. This gas is necessary to support burning
- 3. A word that means "burning"
- 4. Two or more atoms joined together
- 5. The chemical process of making a metal from its ore
- 6. The two elements that make up the Earth's core
- 7. A chemical that is changed into other chemicals in a chemical reaction
- 8. A chemical that is made as a result of a chemical reaction
- 9. It requires a lot of electrical energy to produce this metal from its ore
- 10. This everyday product is made in a chemical reaction from fat or oil

NITROGEN
OXYGEN
COMBUSTION
MOLECULE
SMELTING
